

May 26, 1953

Dear Lu:

Concerning possibility of visit by Lwoff to El-Ch-Mad, Perry Wilson had long ago written to ask him about his coming here. He has just replied that he was returning June 19, and felt he would not have the time. If you can persuade him to the contrary, I am sure we would like to participate.

Lwoff apparently proposed Jacob in his place. We have not discussed this in any detail, but would consider joining in sharing expenses— probably you should work this out directly with Perry, if you are interested.

At the instant I am swamped with work details (mss. etc.) and possibly may not make the trip to CSH (which would be too exhausting). If I should not see you there, you can write Esther or me about the problem you wrote about (concerning fermentation marker and  $Lp^s$  ...): neither of us could quite understand what you were driving at.

Yours sincerely,

Joshua Lederberg
